ETL Listed Intertek 5005344 | DLC QPL LISTED PREMIUM | FC | Energy A

PRODUCT DESCRIPTION

The WRN Linear Strip is ideal for replacing traditional fluorescent lamps. It has multiple advantages.
Easy installation: surface, hanging or continuous row mount. Available in standard and high voltage.
0-10V dimming. Motion sensor and emergency battery optional.

SPECIFICATIONS & LISTINGS

- cETLus, DLC Premium, RoHs & CE
- Excellent 130 Lumens a watt
- Input voltage is AC 100-277 V
- CCT Tunable: 3500K & 4000K & 5000K
- Wattage: 24W / 32W / 40W
- 5 years warranty
- Mounts to almostany surface, multiple options
- High CRI
- Excellent Beam Angle 120 Degrees

Pre-set CCT:50K
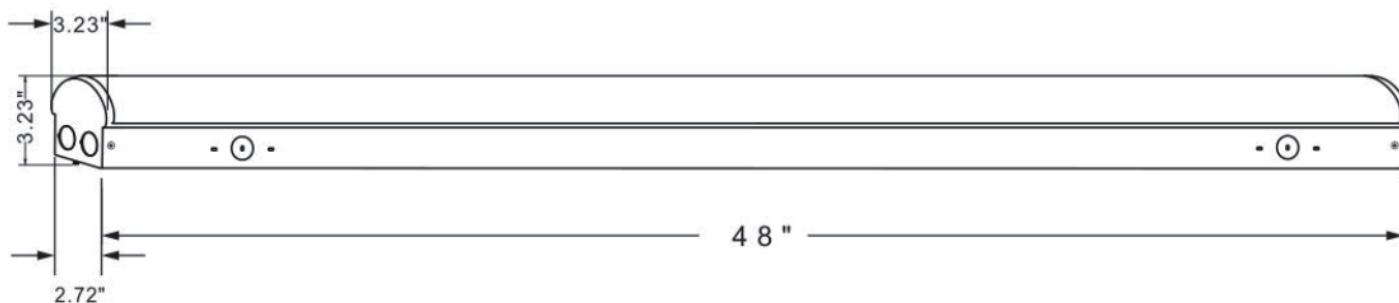

| 2 1 | 1 2 |
| 35K | 40K |

| 1 2 | 1 2 |
| 50K | OFF |

APPLICATIONS

- Offices
- Warehouse
- Garage
- Shopping Mall
- School
- Other commercial applications

Ordering Details

Product Number	Size	Power (W)	Dimensions	Color Temperature (K)	SystemEfficacy (Lm/W)
WRN-4F	4ft	40	48"x2.72"x3.23"	3500K/4000K/5000k	130

PHOTOMETRIC DATA

Rated Power	24W/32W/40W
Input Voltage	100-277VAC
Lighting Source	LED SMD
Power Factor	>0.9
Beam Angle	120°
Lens	Frosted PC
Dimming Function	0 - 10 V
Operating Temperature	-20°C to 40°C
IP Rating	Ip20

DIMENSIONS

PACKAGE DIMENSIONS

Item	N. W.	L*W*H	Qty.	G. W.
4ft 24W/32W/40W	11 lbs /CTN	26.2"x7.48"x7.68"	4 pcs/CTN	12lbs /CTN

CHAIN INSTALLATION (Option One)

Step1 . Insert a chain on each hook and insert hooks into the installationholes
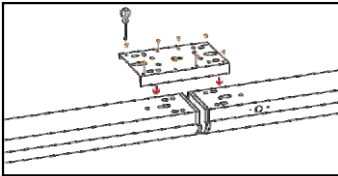

Step 2. Attach the chains to the ceiling and adjust till balanced and secured

Step 3. Take wires from the shielded cables, connect AC wires and Dimming wires (if needed)

Step 4. Wrap the wires with metal materials
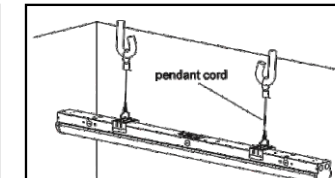

Step 5. Optional seamless infinite splicing

## CHAIN INSTALLATION (Option Two)

Step 1. Snapbucklesinto the lamp body
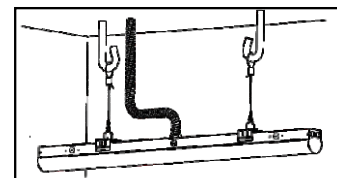

Step 2. Attach the hooks at the slottedholesofbuckles

Step 3. Hook buckles with pendant cord and suspendthe light tothedesire d height
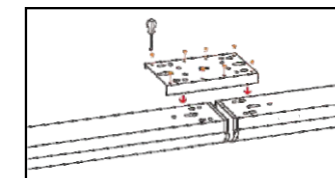

Step 4. Take wires from the terminal caps, connect AC wires and Dimming wires (if needed)

Step 5. Insert the terminal blocks and wires into the strip

Step 6. Insert the wire terminal joints to the wire entry
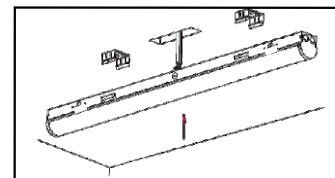

Step 7. Optional seamless infinite splicing
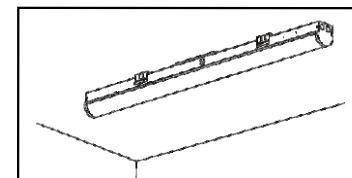

SURFACE MOUNTED INSTALLATION

Step 1. Fix the buckles in parallel by screws with 18.9" distance between each buckle

Step 2. Take wires from the terminal caps, connect AC wires and Dimming wires (if needed)

Step 3. Secure the strip with buckles

Step 4. Installation is completed
